## Experience

### Webskyne

**November 2022 – February 2023**

*Web Developer*

*Remote*

- Worked for various client-side projects and developed responsive and user-friendly web applications using Next.js and Nest.js and collaborated with project managers and team members to ensure timely completion of projects.
- Created custom features such as dynamic forms, real-time chat functionality, and integration with Backend APIs.
- Contributed to various CRM projects and participated in daily scrum meetings to discuss progress, blockers, and next steps.

### Freelance Graphic Designer

**January 2023 – Present**

*Graphic Designer*

*Chembur*

- Designed and laid out a 120-page college annual magazine featuring articles, interviews, and photographs on InDesign.
- Worked closely with editorial team of the college to ensure design aligned with the magazine's content and vision.
- Currently working on the design of a 50-page brochure for the training and placement cell of the college.

## Projects

### Emotion Detector | Python, Streamlit

**Februray 2023**

- Developed an emotion detection system using machine learning techniques to analyze text data and classify emotions.
- Involved data collection, data pre-processing, model training and building, deployment of the model using Streamlit.

### weGuide | ReactJs, MongoDB, Express, Node, Mongoose

**September 2022**

- Built a Full Stack Career guidance application helping students choose a career path after 10th and 12th grade.
- Developed a user-friendly interface and a career assessment tool that recommends various career paths based on a student's skills, interests, and preferences and added features like adding and reading blogs and building a community.

### MediPlus | Python, FastAPI, Firebase, Next.js

**March 2023**

- Utilized machine learning algorithms to predict diseases such as diabetes, heart disease, and breast cancer.
- Contributed to the healthcare industry by providing a tool to predict diseases and improve access to medical resources.

### SkillBrisk | React.js, Next.js, Express.js, Node.js, MongoDB

**March 2023**

- Built platform for freelancers and clients to connect with each other, allowing sellers to post their gigs, showcasing proficiency in the MERN stack, problem-solving, and collaboration
- Implemented features that make it easy for freelancers to create a profile, showcase their skills and experience

## Hackathons

---

### CropKart

**February 2023**

*VESIT Hacks | [GitHub Link](#)*

*VESIT, Chembur*

- Secured 3rd Position in a VESIT-Hacks organized by E-Cell team of VESIT.
- Developed a platform for farmers and customers which allowed direct delivery of vegetables and fruits from the farm, thus bypassing intermediaries and allowing for fresher and more affordable produce.
- Used technologies and frameworks like Next.js, TypeScript, Tailwind CSS for the frontend part, Python for model building and Firebase for the database.

## Leadership / Extracurricular

---

### VESITConnect

**December 2021 – Present**

*Deputy Design Head*

*VESIT, Chembur*

- Covered and wrote over 10 articles about various workshops and events for the college newsletter.
- Collaborate with other team members to curate engaging content and lead the design team to ensure visually appealing and professional publications.

### CSI-VESIT

**December 2021 – August 2022**

*Public Relations Officer*

*VESIT, Chembur*

- Involved in promoting and creating awareness about the various events and workshops organized by CSI-VESIT.
- Created promotional content such as social media posts and flyers to generate interest and increase attendance.
